SHORTENED STATUTORY PERIOD OF RESPONSE	MAIL DATE	DELIVERY MODE
3 MONTHS	03/15/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary

Application No.

10/720,461

Applicant(s)

WEBB ET AL.

Examiner

James Keenan

Art Unit

3652

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 6/9/06, 9/19/06, and 12/15/06.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 11-18 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 11-18 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 24 November 2003 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Paper No(s)/Mail Date _____ | 6) <input type="checkbox"/> Other: _____ |

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

The specification to which the oath or declaration is directed has not been adequately identified. See MPEP § 602.

The oath refers to the title of the application as "Tilting loading ramp for pickup trucks and like vehicles". This does not match the title of the application as set forth in the specification which is "Universal pickup loading ramp".

2. The amendment filed 6/9/06 has not been entered. Because the original specification did not include numbered paragraphs, the instructions to replace specific paragraph numbers with new paragraphs can not be followed. The paragraph numbers used by applicant do not seem to correspond to the actual sequence of paragraphs in the original specification. Because the new and amended drawings are described in the amended specification, they have not been entered either.

3. The (original) drawings are objected to because figure 6 comprises five (5) separate figures which should be labeled and referred to separately in the specification. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an

Art Unit: 3652

amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. The listing of references in the (original) specification is not a proper information disclosure statement. 37 CFR 1.98(b) requires a list of all patents, publications, or other information submitted for consideration by the Office, and MPEP § 609.04(a) states, "the list may not be incorporated into the specification but must be submitted in a separate paper." Therefore, unless the references have been cited by the examiner on form PTO-892, they have not been considered.

5. The amendments filed 6/9/06 and 12/15/06 are objected to under 35 U.S.C. 132(a) because they introduce new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as

Art Unit: 3652

follows: the particular type of damper now being claimed in claim 11. Note that although the 6/9/06 amendment has not actually been entered, the recitation in new paragraph [0004] of a gas spring damper and damper reaction arm, as well as the depiction thereof in new fig. 7, would be new matter if this amendment is resubmitted

Applicant is required to cancel the new matter in the reply to this Office Action.

6. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

7. Claims 11-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The recitation of a "damper reaction tube" and a "gas spring damper" is considered new matter, as no such teaching was present in the disclosure as originally filed.

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3652

9. Claims 11-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, lines 2 and 3, there is no antecedent basis for "the ... brackets" and "the ... hardware"; furthermore, these elements are improperly positively recited in that they are part of the truck which is merely inferentially set forth in lines 12-14;

line 7, it is not clear what is meant by "ramp support ... assembly"; line 2 recites a "ramp support structure", while line 5 recites a "ramp assembly" (is the recitation in line 7 the combination of these two elements?);

in line 10, it is not clear what is meant by nor is there antecedent basis for "the rate of pivot of the ramp";

and in lines 12-14, this paragraph should apparently be the preamble; it is not clear why it has been placed at the end of the claim.

Claim 12 does not appear to further limit claim 11.

In claim 14, "may be easily removed" is vague and fails to present a meaningful patentable limitation.

Claim 15 does not further limit claim 11; furthermore, "or similar" is vague.

In claim 16, it is not clear what is meant by "extends the bed".

In claim 17, "may be ... adjusted" is vague and fails to present a meaningful patentable limitation.

Art Unit: 3652

10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

11. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

12. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Art Unit: 3652

13. Claims 11-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chevrier (US 2001/0031193) in view of Lance (US 5,907,276) and Maloney (US 4,647,270), all previously of record.

Chevrier shows a two-section, telescopic, pivoting loading ramp for a pickup truck bed, wherein a support frame is connected to "truck pivot hardware" 6.

It is not clear if the truck pivot hardware comprises the tailgate mounting brackets of the pickup truck, although it is noted that the ramp does replace the tailgate.

Lance shows a similar pickup loading ramp which is pivotally connected to the tailgate mounting brackets (col. 3, lines 17-20).

It would have been obvious for one of ordinary skill in the art at the time of the invention to have modified the apparatus of Chevrier such that the support frame for the ramp pivotally connected to the tailgate mounting brackets, as shown by Lance, as this would simply be the substitution of a well known ramp mounting system in the same environment, which would neither require undue experimentation nor produce unexpected results.

Chevrier does not show an adaptor plate and arm connecting the ramp support frame to the tailgate mounting structure or a damper to modulate the rate of pivot of the ramp.

Maloney shows a truck having a pivotally mounted ramp with a damper 50 and an adaptor plate 52.

It would have been obvious for one of ordinary skill in the art at the time of the invention to have modified Chevrier with a damper and adaptor plate, as shown by

Art Unit: 3652

Maloney, as this (damper) would allow better control of the pivoting motion, and (adaptor plate) would simply be an art recognized alternate equivalent means of attaching the ramp to the truck bed.

Re claim 17, note that Chevrier discloses embodiments of the ramp in which it is adjustable in size to fit various vehicles.

14. Applicant's arguments filed 9/19/06 have been fully considered but they are not persuasive. Although applicant states that the invention differs from the cited references in several ways, the claims themselves must present a complete, operative device which defines over and is non-obvious in view of the prior art. Merely stating vague and abstract ideas, such that no tools are required to assemble the device, does not in any way explain how the claims structurally differ from the cited prior art.

15. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee of \$250 (small entity).

Art Unit: 3652

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

16. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.

Certificate of Mailing

I hereby certify that this correspondence is being deposited with the United States Postal Service with sufficient postage as first class mail in an envelope addressed to:

Commissioner for Patents
